Big Bore Pistol & Field Pistol (100 meter)

Targets scaled to be "visually correct" when all targets are placed at 100 meter.

The percentage in the silhouette indicates how much it was resized, based on the original size for Big Bore Pistol.

Field Pistol targets are visually the same size as Big Bore Pistol targets, since they are 1/2 (50%) of the size and are placed at 1/2 (50%) of the distance.
